TU Red - Retention Description				
Species	Retention Amount (%)	Diameter Range	Criteria	Distribution
Fd	9 - 19% (14%)	All	Retain trees with yellow paint, substitute if necessary	Where marked in field
Cw	2 - 8% (5%)			
HW	0 - 2% (1%)	All	Retain these where necessary for operational or safety reasons or in reserve clusters. A few of these species are marked for retention.	N/A
B				
PI				
Pw	75 - 95% (85%)	All	Retain all where feasible within safety and operational constraints	Where present
Py				
Sx				
Deciduous	15 - 35% (25%)	All	Select healthy windfirm trees for retention	Patches, clusters, single trees, where present
*Retain trees of any species if required for operational or safety constraints - Marked trees can be harvested and replaced as required				
Non Merch: Retain Non-merch where feasible within operational and safety constraints.				
Stubbing: No Stubbing				
Blowdown Management: Trees selected for retention appeared windfirm and healthy at time of marking				

Mapsheet: 82F.044.4	Elevation (min / max): 780 - 970m	Lat/ Long Ref: 117°16'39.79"W 49°27'52.11"N
