EVACUATION ALERT REMOVED

Date: August 22, 2022

Time: 2:00PM

The Regional District of Central Kootenay has been advised that the potential for imminent danger of the Briggs Creek Wildfire (N70969) to the life and property of persons, resident or present from Kaslo Creek South Fork Road, Kaslo, British Columbia, has diminished at this time.

The Evacuation Alert has, therefore, been REMOVED for all properties, but may be re-activated if wildfire hazards pose a threat to people and property adjacent to Kaslo Creek South Fork Road.

In the event that conditions change and Evacuation Alert or Order may be re-issued and the evacuation process will re-commence.

A handwritten signature in black ink, appearing to read "Stephane Coutu", is positioned above a horizontal line.

Stephane Coutu
Deputy Director, Emergency Operations Centre
