New Edgewood Reservoir and Booster Station Project: Start of Construction

The RDCK would like to inform the Edgewood community that our contractor, Kaslo Industrial Ltd., has begun construction for the new Edgewood reservoir and booster station at the new wells site. We expect minimal disruption for Edgewood residents during the construction period. The project is expected to be completed by April 2020.

At some point during the construction period, Kaslo Industrial will need to tie-in to the existing distribution watermain. We will advise the community of the associated service interruption via public notices, sandwich board signs, and our water notifications service.

To sign up for our water notifications service, in order to receive notices about the Edgewood water system's service interruptions, water quality, system maintenance activities, and water conservation by telephone call and/or text message, please call Kim at 1-833-223-2662.

We thank Edgewood water users for their cooperation during this construction period. **For more information contact the RDCK at 250-352-8171 or visit our website at www.rdck.ca/water.**
